

Steps for Creating a Package using MSIX Packaging Tool

Steps:

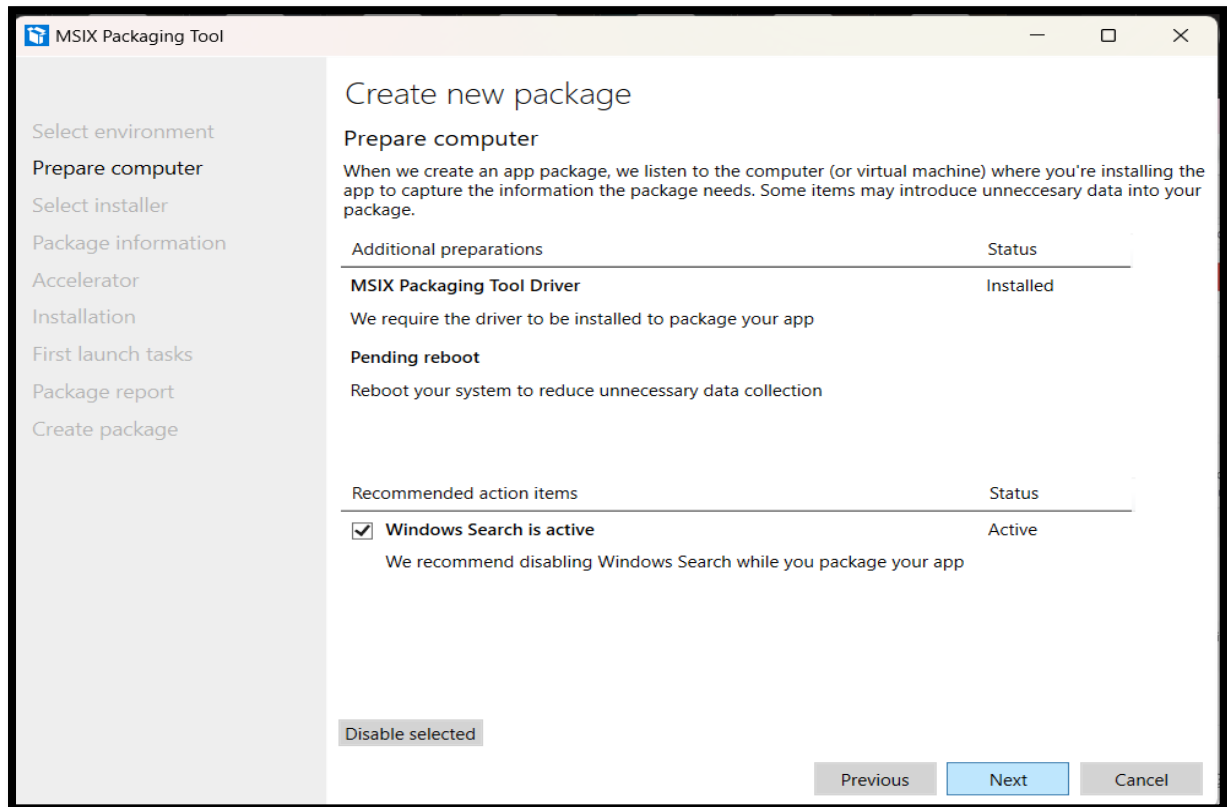

- 1) Download **MSIX Packaging Tool** from Microsoft Store
- 2) Open MSIX Packaging Tool and in **Select Task** select **Application Package**

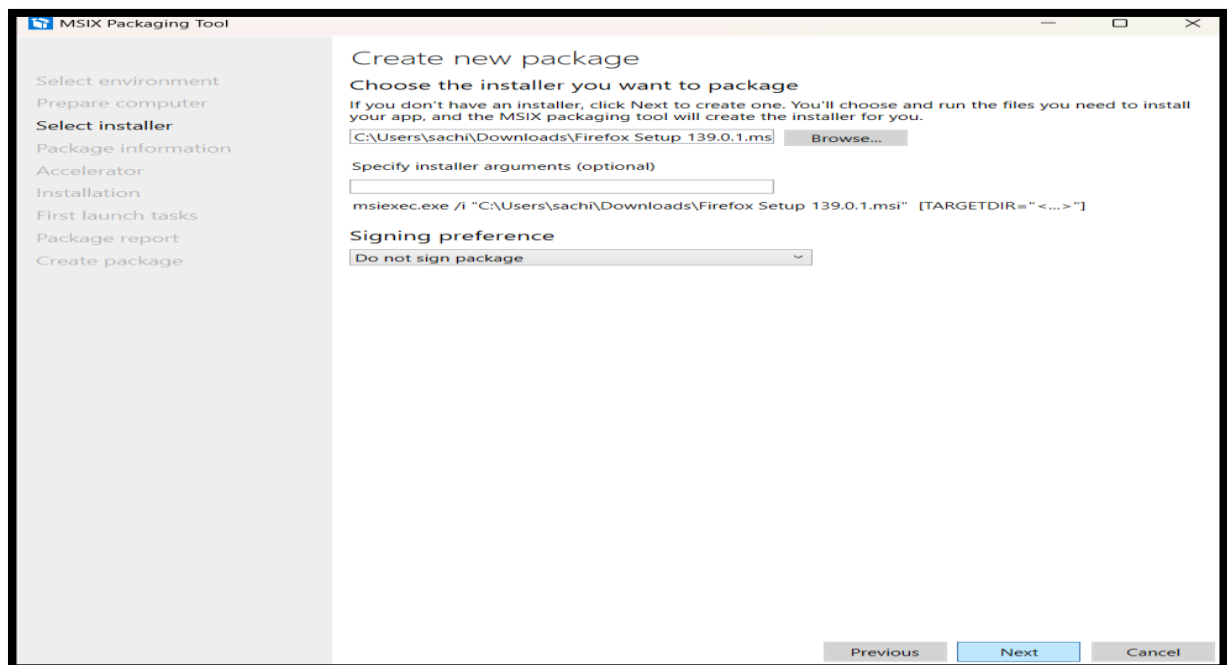

- 3) In **Select environment** tab, select first radio button **Create package on this computer** and click **Next**

4) In **Prepare computer** tab, after the status shows **Installed**, at the bottom click on checkbox **Windows Search is active** and click **Next**

5) In **Select installer** tab, browse our .msi file (Firefox Setup 139.0.1.msi) and in **Signing preference** dialog box select **Do not sign package** and click **Next**

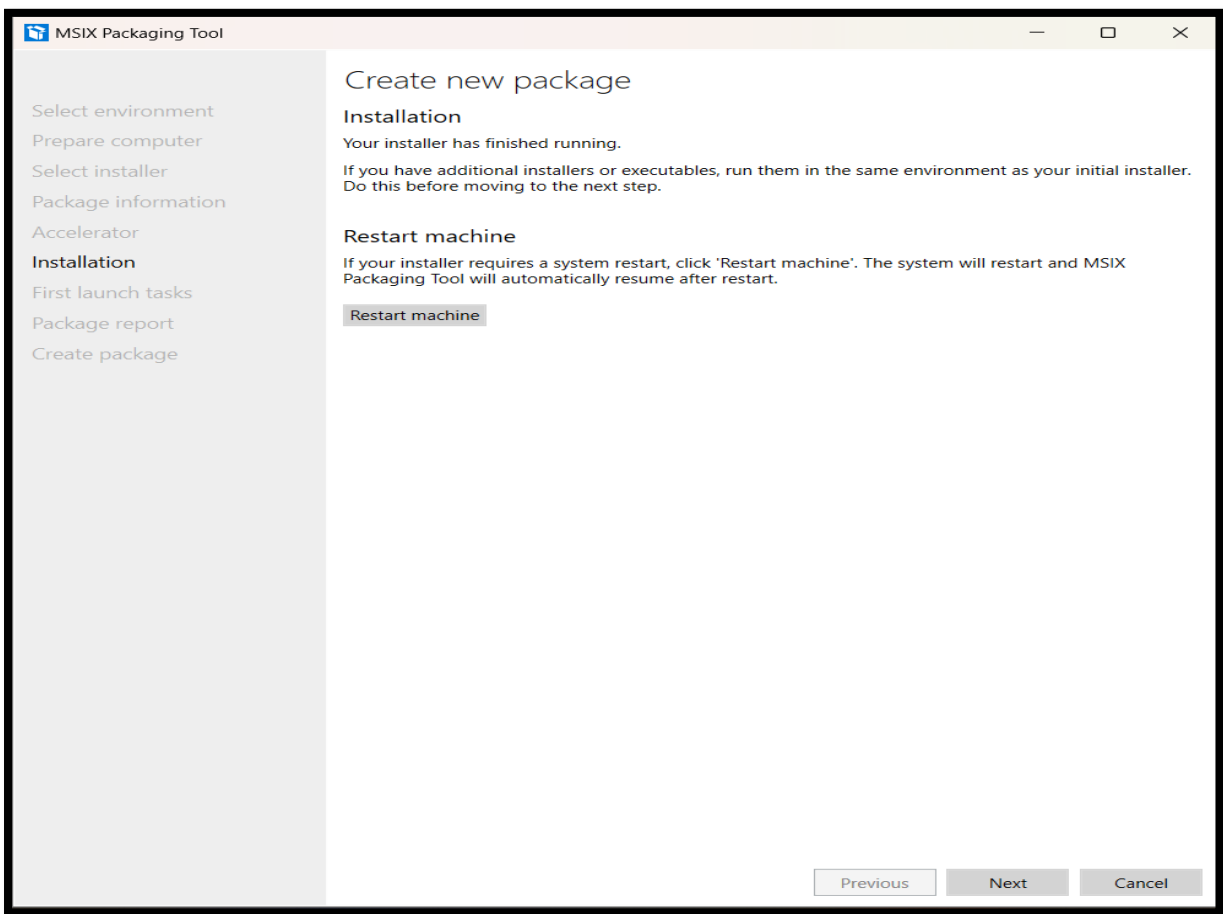

6) In **Package information** tab, in the **Publisher name** textbox write **CN=M** and click **Next**

The screenshot shows the 'MSIX Packaging Tool' window with the 'Create new package' title. On the left is a sidebar with navigation links: 'Select environment', 'Prepare computer', 'Select installer', 'Package information' (highlighted), 'Accelerator', 'Installation', 'First launch tasks', 'Package report', and 'Create package'. The main area is titled 'Create new package' and contains the 'Package information' section. It includes the following fields: 'Package name *' (MozillaFirefox139.0.1x64en-US), 'Package display name *' (Mozilla Firefox 139.0.1 x64 en-US), 'Publisher name *' (CN=M), 'Publisher display name *' (Mozilla), 'Version *' (139 . 0 . 1 . 0), 'Package Description' (Mozilla Firefox 139.0.1 x64 en-US), and 'Installation location' (empty). A 'Browse...' button is next to the installation location field. Below these fields, there is a checked checkbox 'Add support for MSIX Core to this package. See <https://aka.ms/MSIXCore> to learn more.' and a dropdown menu 'Windows Version for MSIX Core support' set to 'Windows 10 2015 LTSB (1507) (10.0.10240.0)'. A warning message states: 'Once you continue to the next page, installation will begin and you will not be able to return.' At the bottom right are 'Previous', 'Next', and 'Cancel' buttons.

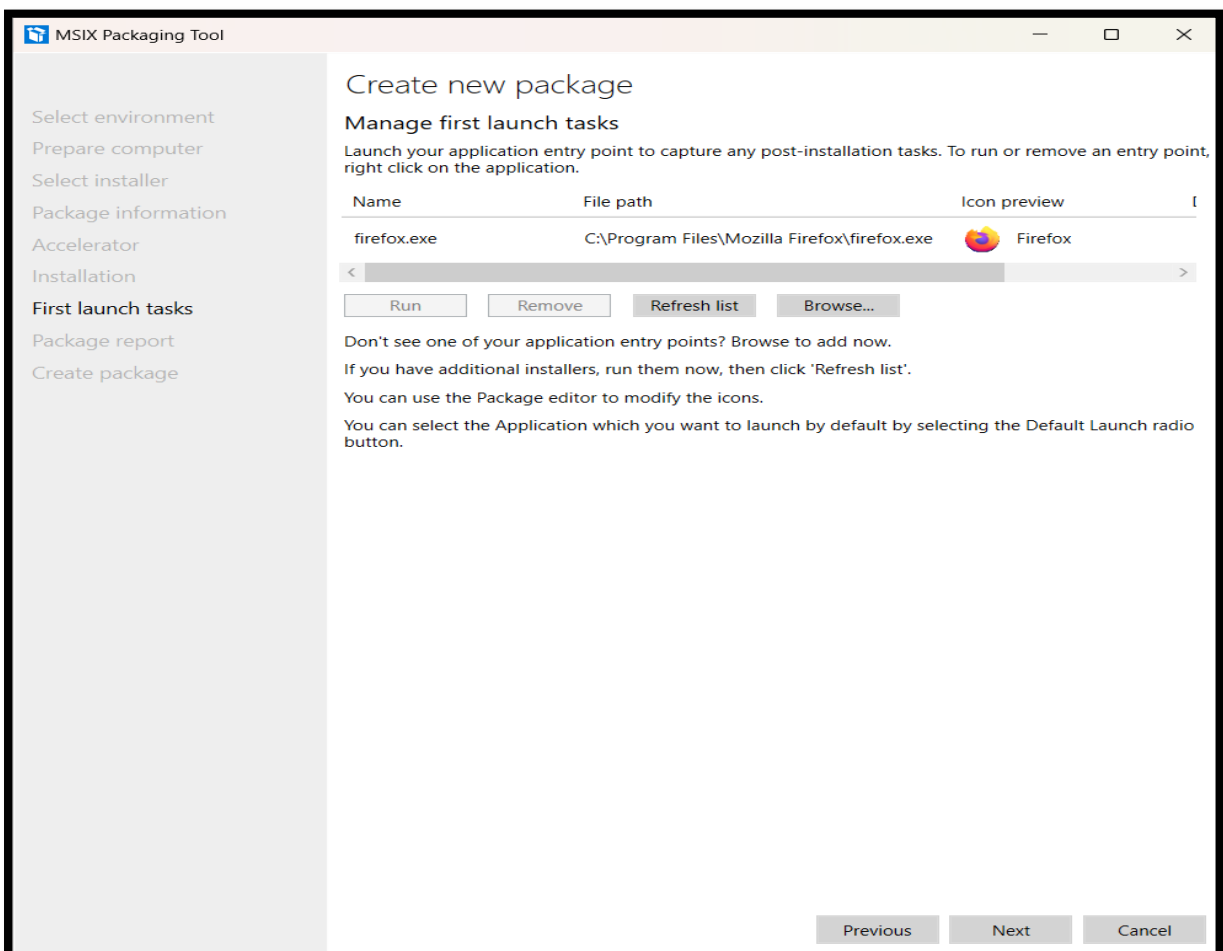

7)In **Accelerator** tab, do nothing and click **Next**

The screenshot shows the 'MSIX Packaging Tool' window with the 'Create new package' title. The sidebar on the left has 'Accelerator' highlighted. The main area is titled 'Create new package' and contains the 'Choose the Accelerator for applying to the package' section. It includes the text 'If you don't have an Accelerator, click Next to proceed with conversion.' and an empty text box with a 'Browse...' button. Below this, it says 'Sample Conversion Accelerators [here](#).' At the bottom right are 'Previous', 'Next', and 'Cancel' buttons.

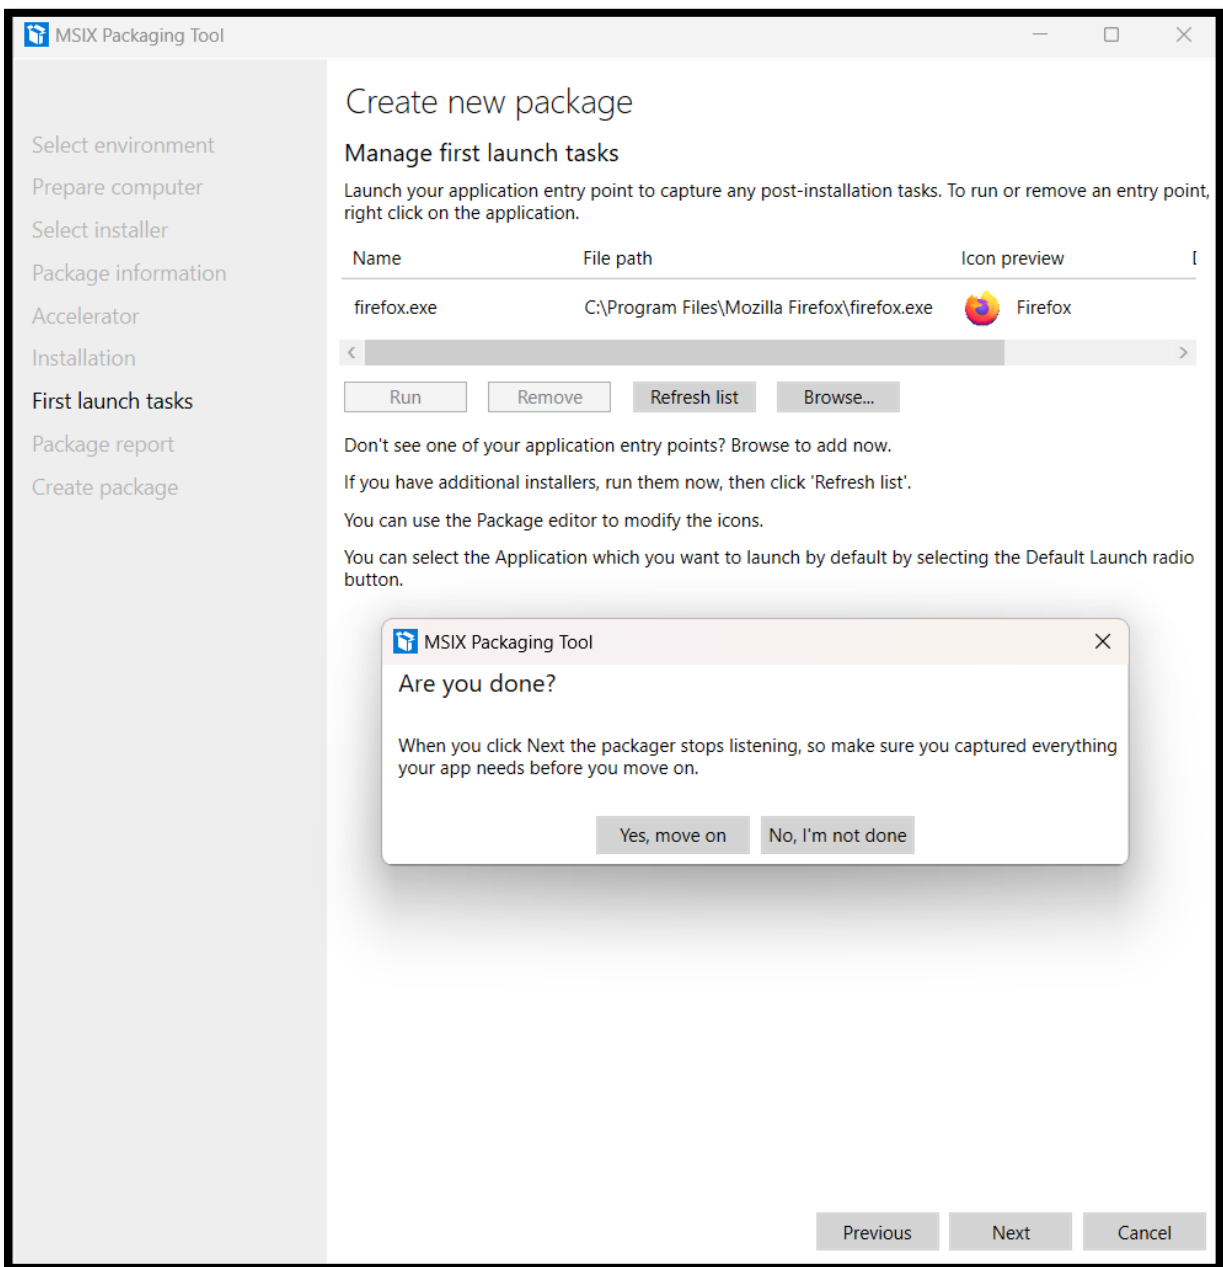

8)In **Installation** tab, do nothing and click **Next**

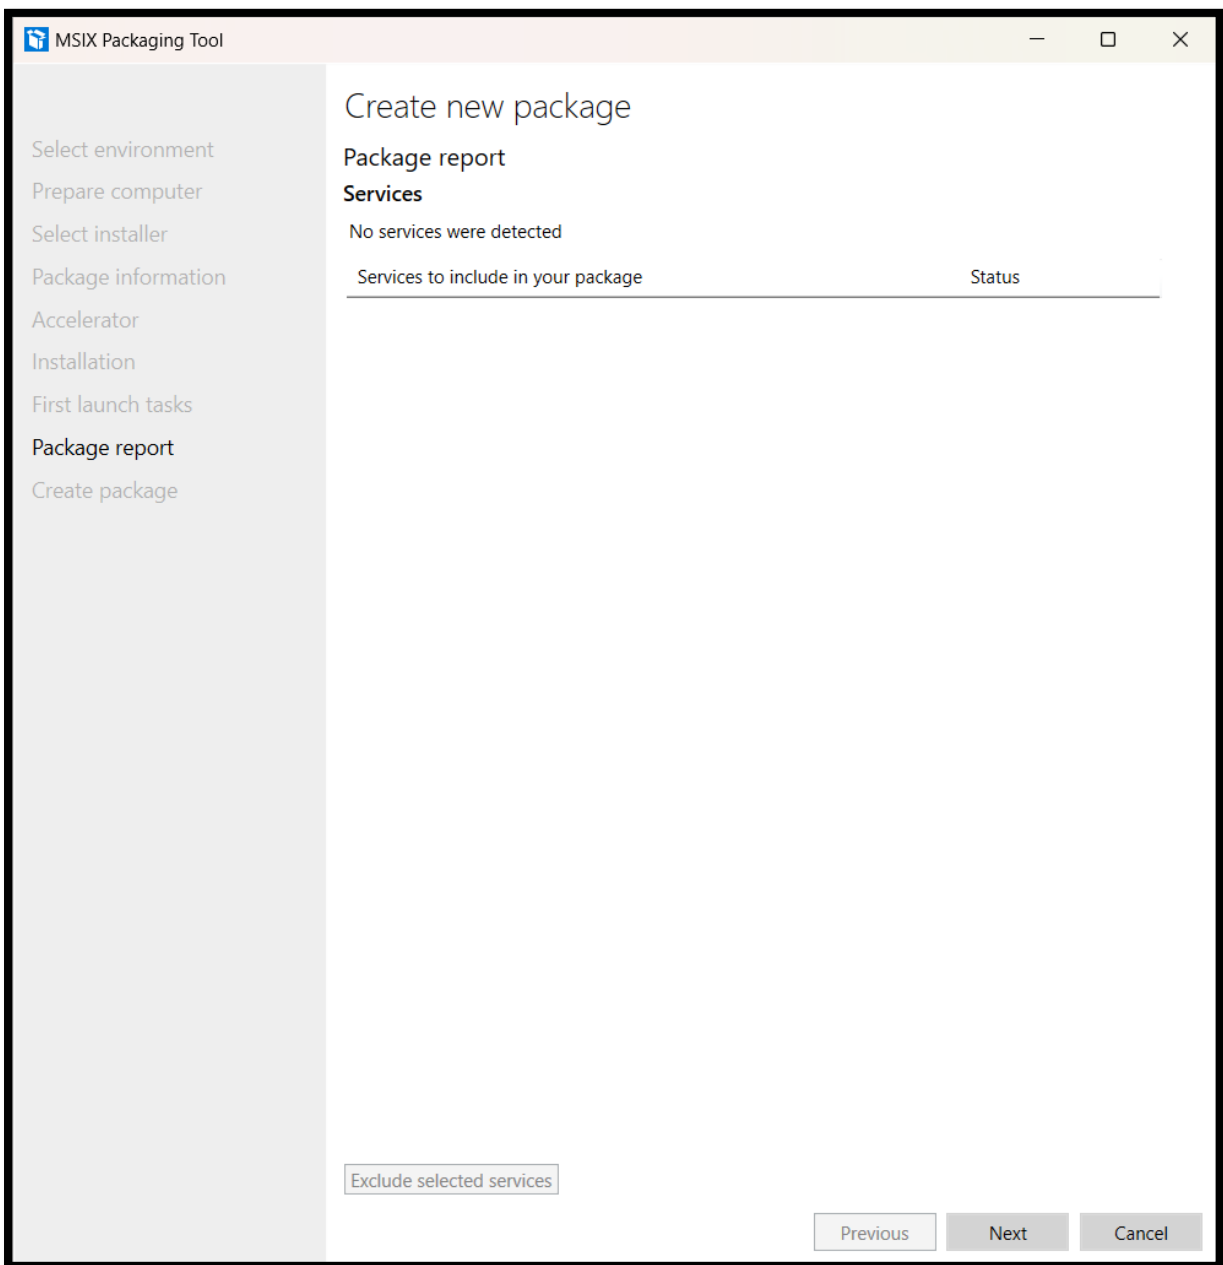

9) In **First launch tasks** tab, do nothing and click **Next** and then a small popup comes asking **Are you done?** so click **Yes, move on** button

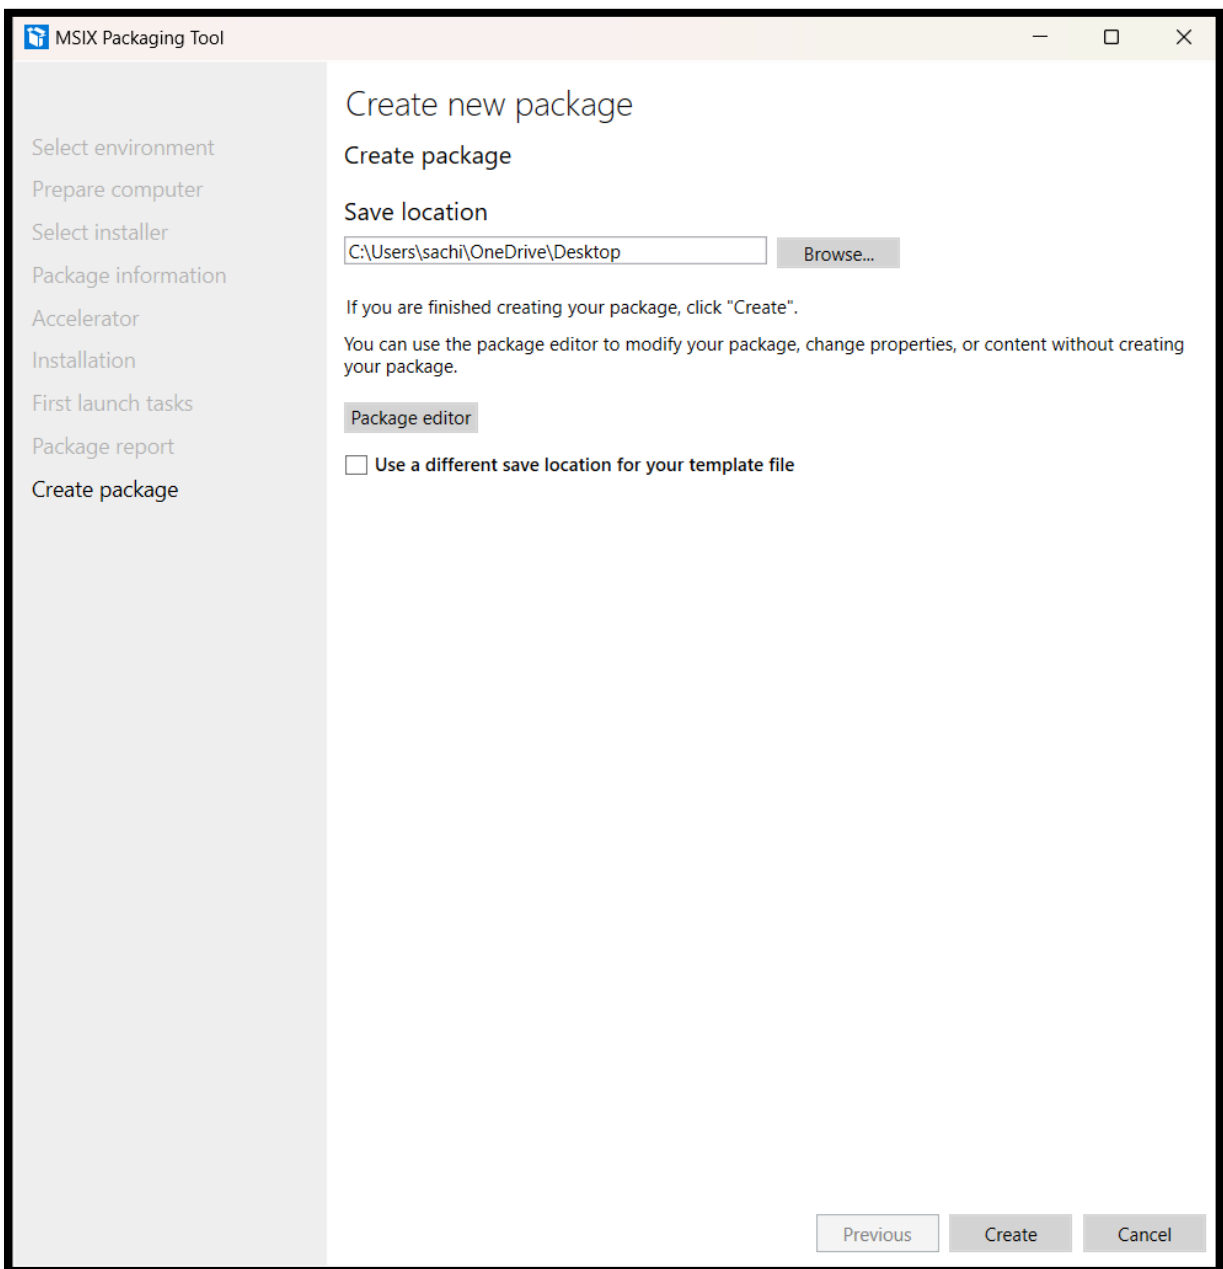

➤ Click on Yes, move on box

10) In tab, do click **Package report** tab, do nothing and click Next

11) In **Create package** tab, browse the path where we want our Package and Files to be placed after getting created and click **Create** and then a small popup comes **Package successfully created** so click **Close** button

12) Open check for files in directory **File Explorer** and **.msix** and **.xml** our preferred
